SKILLS

- **Frontend**: React.js, JavaScript Redux Toolkit, Tailwind CSS, HTML, CSS
- **Backend:** Node.js, Express.js (currently building full-stack project)
- **Tools:** Figma, Git, GitHub, Vercel
- **Programming:** Java (Core Java, OOP Fundamentals)

EDUCATION

- Master of Computer Applications (MCA)| RCC Institute of Information Technology | Maulana Abul Kalam Azad University of Technology, West Bengal **(2023-2025)**
- Bachelor of Computer Science (Hons) | Bethune College | University of Calcutta **(2020-2023)**
- St. Stephen's School (ICSE) Higher Secondary (Science) |Dum Dum **2020**

PROJECTS

- **Portfolio website| React, Tailwind CSS | Live Demo**
  This project is a fully responsive personal portfolio website built using React and Tailwind CSS. It showcases my skills, projects, education, and contact information through a clean, modern, and user-friendly interface.

- **SAAS website | React, Tailwind CSS | Live Demo**
  Developed a responsive AI SaaS landing page using React.js and Tailwind CSS implementing reusable components and modern UI sections including Hero, Services, Stats, and Pricing.

- **Penny Flow-tracks expense | HTML, CSS, JavaScript | Live Demo**
  Penny Flow is a client-side expense tracking web application that uses local Storage to persist data. It enables users to add and categorize income and expense entries through a form and dynamically calculates and displays the current balance with real-time UI updates

- **Quiz web app| HTML, CSS, JavaScript | Live Demo**
  Developed a responsive quiz website featuring multiple-choice questions with instant visual feedback. Implemented logic to lock answers once selected and display the final score with a performance-based message for an engaging user experience.

- **Rhythm-music player | HTML, CSS, JavaScript | Live Demo**
  Rhythm is a responsive music player web application that allows users to play and switch between 10 songs, using an array of objects to manage song data. It features a dynamic now-playing bar that updates the active track in real time, ensuring a smooth experience across devices.

- **Pulp-responsive website| Figma, HTML, CSS, JavaScript | Live Demo**
  Pulp is a responsive, animated website designed in Figma and developed using HTML, CSS, and JavaScript, featuring interactive search and login forms triggered through JavaScript event handling and smooth animations for a consistent, user-friendly experience across devices
