SKILLS

- **Frontend:** React.js, JavaScript (ES6+), REST API Integration, Axios, React Hooks, React Router, Tailwind CSS, HTML5, CSS3, Next.js (**Learning**), TypeScript (**Learning**)
- **Backend:** Node.js, Express.js, REST API Development, JWT Authentication, bcrypt, Multer
- **Database:** MongoDB, Mongoose, SQL(Basics)
- **Programming Languages:** Java (Core Java, OOP Fundamentals)
- **Tools & Platforms:** Figma, Postman, Git, GitHub, Vercel
- **Microsoft Office:** Word, PowerPoint, Outlook, Excel (Basic)

EDUCATION

- Master of Computer Applications (MCA) | RCC Institute of Information Technology | Maulana Abul Kalam Azad University of Technology, West Bengal (2023-2025)
- Bachelor of Computer Science (Hons) | Bethune College | University of Calcutta (2020-2023)
- St. Stephen's School (ISC) Higher Secondary (Class XII – Science) | Dum Dum 2020
- St. Stephen's School (ICSE) Secondary (Class X) | Dum Dum 2018

PROJECTS

- **MediConnect | React.js, JavaScript (ES6+), Tailwind CSS, React Router, Axios, Node.js, Express.js, MongoDB, Mongoose, REST APIs, JWT, bcrypt, Multer, Cloudinary | Live Demo**
Developed a full-stack doctor appointment booking system using the MERN stack with separate Patient, Doctor, and Admin portals. Implemented JWT authentication, appointment scheduling, slot management, Cloudinary image uploads, and responsive dashboards. Built REST APIs using Express.js, MongoDB, Mongoose, and bcrypt. Integrated Stripe and Razorpay payment workflows, with live payments disabled in the deployed application.
- **Portfolio website | React, Tailwind CSS | Live Demo**
It is a fully responsive personal portfolio website built using React and Tailwind CSS. It showcases my skills, projects, education, and contact information through a clean, modern, and user-friendly interface.
- **Dashboard website | React, Tailwind CSS | Live Demo**
Developed a responsive analytics dashboard using React.js, Tailwind CSS, Axios, and ApexCharts. Integrated public REST APIs to dynamically display project, client, and team data. Implemented reusable components, state management with React Hooks, and interactive data visualization.
- **Penny Flow-tracks expense | HTML, CSS, JavaScript | Live Demo**
Expense tracking web application that enables users to manage income and expenses, categorize transactions, and monitor balance with real-time updates and Local Storage persistence.
- **Quiz web app | HTML, CSS, JavaScript | Live Demo**
Developed a responsive quiz application with multiple-choice questions, instant feedback, answer locking, and score-based results.
- **Pulp-responsive website | Figma, HTML, CSS, JavaScript | Live Demo**
Designed in Figma and developed Pulp, a responsive website. Implemented interactive search/login forms, JavaScript event handling, and smooth animations for a user-friendly cross-device experience.
