SKILLS

- **Frontend:** React.js, JavaScript (ES6+), REST API Integration, Axios, React Hooks, Tailwind CSS, HTML5, CSS3
- **Backend:** Node.js, Express.js (currently building full-stack project)
- **Programming Languages:** Java (Core Java, OOP Fundamentals)
- **Tools & Platforms:** Figma, Postman, Git, GitHub, Vercel
- **Microsoft Office:** Word, PowerPoint, Outlook, Excel (Basic)

EDUCATION

- Master of Computer Applications (MCA) | RCC Institute of Information Technology | Maulana Abul Kalam Azad University of Technology, West Bengal (2023-2025)
- Bachelor of Computer Science (Hons) | Bethune College | University of Calcutta (2020-2023)
- St. Stephen's School (ICSE) Higher Secondary (Science) | Dum Dum 2020

PROJECTS

- **Portfolio website | React, Tailwind CSS | Live Demo**
It is a fully responsive personal portfolio website built using React and Tailwind CSS. It showcases my skills, projects, education, and contact information through a clean, modern, and user-friendly interface.
- **Dashboard website | React, Tailwind CSS | Live Demo**
Developed a responsive analytics dashboard using React.js, Tailwind CSS, Axios, and ApexCharts. Integrated public REST APIs to dynamically display project, client, and team data. Implemented reusable components, state management with React Hooks, and interactive data visualization.
- **Penny Flow-tracks expense | HTML, CSS, JavaScript | Live Demo**
Expense tracking web application that enables users to manage income and expenses, categorize transactions, and monitor balance with real-time updates and Local Storage persistence.
- **Quiz web app | HTML, CSS, JavaScript | Live Demo**
Developed a responsive quiz application with multiple-choice questions, instant feedback, answer locking, and score-based results.
- **Rhythm-music player | HTML, CSS, JavaScript | Live Demo**
A responsive music player web application that allows users to play and switch between 10 songs, using an array of objects to manage song data. It features a dynamic now-playing bar that updates the active track in real time, ensuring a smooth experience across devices.
- **Pulp-responsive website | Figma, HTML, CSS, JavaScript | Live Demo**
Pulp is a responsive, animated website designed in Figma and developed using HTML, CSS, and JavaScript, featuring interactive search and login forms triggered through JavaScript event handling and smooth animations for a consistent, user-friendly experience across devices
