Professional Summary

MERN Stack Developer and Frontend Developer with experience building full-stack web applications using **React.js, Node.js, Express.js, MongoDB, and REST APIs**. Strong focus on **React.js, JavaScript, Tailwind CSS, Next.js, React Router, and responsive UI design**, with experience developing reusable components, interactive dashboards, and modern user-friendly interfaces.

Education

RCC Institute of Information Technology 2023 – 2025
Master of Computer Applications (MCA) *CGPA: 7.25/10*
Maulana Abul Kalam Azad University of Technology, West Bengal

Bethune College 2020 – 2023
Bachelor of Computer Science (Hons) *CGPA: 7.324/10*
University of Calcutta, West Bengal

St. Stephen's School 2020
Higher Secondary (Class XII – Science), Dum Dum *ISC: 89.75%*

St. Stephen's School 2018
Secondary (Class X), Dum Dum *ICSE: 86.4%*

Skills

Frontend: React.js, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Next.js, TypeScript (Basic), React Router, React Hooks, Axios, REST API Integration
Backend: Node.js, Express.js, REST API Development, JWT Authentication, bcrypt, Multer
Database: MongoDB, Mongoose, SQL
Generative AI: Generative AI, Google Gemini API, LLM API Integration, Prompt Engineering, AI Integration
Software Development: Application Workflow Planning
Tools: Git, GitHub, Postman, Figma, Vercel, Render
AI Tools: ChatGPT, Codex, Antigravity, Claude (AI-assisted coding, debugging, and development)
Languages: Java, JavaScript

Projects

MediConnect | *React.js, Node.js, Express.js, MongoDB, Tailwind CSS, JWT, REST APIs* | Live Demo
- Engineered a full-stack doctor appointment booking platform using the MERN stack with 3 role-specific portals for Patients, Doctors, and Admins.
- Applied JWT authentication, role-based access control, appointment scheduling, slot management, and RESTful APIs for user and appointment management.
- Built a responsive user interface using React.js and Tailwind CSS, integrated Cloudinary for image uploads, and worked with Stripe and Razorpay payment workflow implementation.

NoteFlow | *Next.js, React.js, Tailwind CSS, React Context API* | Live Demo
- Created a responsive note-taking application featuring CRUD operations, search, sorting, dark mode, and localStorage persistence.
- Established a modern landing page and interactive dashboard using reusable React components, Motion animations, and toast notifications.

PennyFlow MERN | *React.js, Node.js, Express.js, MongoDB, Gemini API* | Live Demo
- Converted my original frontend-only PennyFlow project into a full-stack MERN application with income and expense management, real-time balance calculations, and transaction summaries.
- Implemented secure authentication using JWT, Google Sign-In, bcrypt password hashing, and email OTP-based password recovery.
- Integrated Google Gemini API to build an AI-powered financial assistant that generates insights from users' transaction data, including spending patterns and expense categories.
- Connected the frontend with REST APIs and MongoDB Atlas, and deployed the application on Render.

Pulp Responsive Website | *Figma, HTML, CSS, JavaScript* | Live Demo
- Crafted the user interface in Figma and developed a fully responsive website.
- Integrated interactive forms, JavaScript event handling, and smooth animations.
